KNORR-BREMSE FILTER PROGRAM

TRUCKSERVICES

Disclaimer

The information contained in this document is intended for the exclusive use of trained persons within the commercial vehicle industry, and must not be passed on to any third party. All recommendations regarding products and their servicing or usage are with reference to Knorr-Bremse products and should not be considered applicable to products from other manufacturers.

This information does not purport to be all-inclusive and no responsibility is assumed as a result of its use. We cannot accept any liability nor offer any guarantee regarding data accuracy, completeness or timeliness. The information does not represent any guarantee or ensured characteristics of the Products or Systems described. No liability can be accepted based on the information, its use, recommendations or advice provided. In no event may we be held liable for any damage or loss except in the case of wilful intent or gross negligence on our part, or if any mandatory legal provisions apply.

Any legal disputes arising from the use of this information shall be subject to German law.

Note: If service work is carried out on the vehicle, it is the responsibility of the workshop to ensure the vehicle is fully tested and in full functional order before the vehicle is returned into service. Knorr-Bremse accepts no liability for problems caused as a result of appropriate tests not being carried out.

This disclaimer is an English translation of a German text, which should be referred to for all legal purposes.

SAFETY AND ENVIRONMENT GUIDELINES

Note: The safety advice listed below is applicable to general service and diagnostic work on braking systems. Also observe any recommendations from the axle or vehicle manufacturer concerning towing, jacking-up and securing the vehicle.

CAUTION: KNORR-BREMSE IS NOT LIABLE FOR ANY INJURIES OR DAMAGES CAUSED BY IMPROPER USE OF SPECIFIED SERVICE KITS AND/OR SERVICE TOOLS. FURTHERMORE, MISUSE OF TOOLS OR INCORRECT INSTALLATION OR APPLICATION OF SERVICE KITS MAY RESULT IN DAMAGE OR POTENTIALLY UNSAFE VEHICLE OPERATIONS. IN THIS CASE, KNORR-BREMSE DOES NOT HAVE ANY WARRANTY OBLIGATIONS.

Before and whilst working on or around compressed air systems and devices, the following precautions should be observed, along with the many hazard notes contained throughout the document:

- 1 Always wear safety glasses when working with air pressure.
- 2 Never exceed the vehicle manufacturer's recommended air pressures.
- 3 Never look into air jets or direct them at anyone.
- 4 Never connect or disconnect a hose or line containing pressure; it may whip as air escapes.
- 5 When removing or servicing a product, ensure all pressure related to the specific system it is contained in has been depleted to 0 bar. Be aware that if the vehicle is equipped with an air dryer system, it can also contain air pressure along with its purge reservoir, if fitted, even after pressure has been drained from the other reservoirs.
- 6 If it is necessary to drain the air pressure from reservoirs, etc., keep away from brake actuator push rods and levers since they may move as system pressure drops. On vehicles fitted with air suspension, it is advised when undertaking such work, to support the chassis from sudden lowering and therefore prevent any possibility of being trapped between the chassis and axle or ground.
- 7 Park the vehicle on a level surface, apply the parking brakes, and always chock the wheels as depleting vehicle air system pressure may cause the vehicle to roll.
- 8 When working under or around the vehicle, and particularly when working in the engine compartment, the engine should be shut off and the battery disconnected. Where circumstances require that the engine be running, EXTREME CAUTION should be taken to prevent personal injury resulting from contact with moving, rotating, leaking, heated or electrically charged components. Additionally, it is advisable to place a clear sign on or near the steering wheel advising that there is work in progress on the vehicle.
- 9 When working on vehicles equipped with air suspension, to guard against injury due to unexpected downward movement of the chassis caused by sudden pressure loss in the suspension system, ensure that the vehicle chassis is mechanically supported with a 'prop' between the chassis and the axle or between the chassis and the ground.
- 10 Examine all pipework for signs of kinks, dents, abrasion, drying out or overheating. Be aware that kinks in pipework may result in air pressure being trapped in the pipework and associated equipment. Replacement hardware, tubing, hose, fittings, etc. must be of equivalent size, type and strength as original equipment and be designed specifically for such applications and systems. Check the attachment of all pipework; it should be installed so that it cannot abrade or be subjected to excessive heat.
- 11 Components with stripped threads or damaged/corroded parts must be replaced completely. Do not attempt repairs requiring machining or welding unless specifically stated and approved by the vehicle or component manufacturer.
- 12 Never attempt to install, remove, disassemble or assemble a device until you have read and thoroughly understood the recommended procedures. Some units contain powerful springs and injury can result if not properly dismantled and reassembled. Use only the correct tools and observe all precautions pertaining to use of those tools.
- 13 Before removing any device note its position and the connections of all pipework so that the replacement/serviced device can be properly installed. Ensure that adequate support or assistance is provided for the removal/installation of heavy items.
- 14 Use only genuine replacement parts, components and kits as supplied by Knorr-Bremse or the vehicle manufacturer. Only use the recommended tools as specified in related Knorr-Bremse instructions.
- 15 The serviced or replaced product must be checked for correct function and effectiveness.
- 16 If products have been dismantled, serviced or replaced, whose performance could affect braking performance or system behaviour, this should be checked on a roller dynamometer. Bear in mind that a lower performance may be experienced during the bedding-in phase if new brake pads/linings and/or brake discs/drums have been fitted.
- 17 The use of impact screwdrivers or impact wrenches in conjunction with Knorr-Bremse service tools for air disc brakes is not permitted. The service tools are not designed for such use. It is likely that the tools or the vehicle will be damaged and there is a serious risk of injury – see Caution above.
- 18 Do not use compressed air to clean the disc brake. Avoid air contamination of brake dust.
- 19 Prior to returning the vehicle to service, make certain that all components and the complete brake systems are leak free and restored to their proper operating condition.

Welding

To avoid damage to electronic components when carrying out electrical welding, the following precautions should be observed:

- 1 In all cases, before starting any electrical welding, remove all connections from any electronic control units or modules, noting their position and the order in which they are removed.
- 2 When re-inserting the electrical connectors (in reverse order) it is essential that they are fitted to their correct assigned position - if necessary this must be checked by PC Diagnostics.

Disposal of Waste Equipment by Business Users in the European Union

This symbol on the product, packaging or in user instructions, indicates that this product must not be disposed of with other general waste. Instead, it is your responsibility to dispose of the waste electrical and electronic parts of this product by handing them over to a company or organisation authorised for the recycling of waste electrical and electronic equipment. For more information about arrangements for waste equipment disposal please contact your Knorr-Bremse distributor or local Knorr-Bremse representative.

AIR, CABIN, FUEL AND OIL FILTERS FROM KNORR-BREMSE

With more than 20 years' field experience in air drying and filtration and more than 30 million Air Dryer Cartridges produced, Knorr-Bremse is one of the top names when it comes to providing commercial vehicles throughout the world with premium quality Air Dryer Cartridges.

Drawing on its wealth of experience and extensive expertise in developing products for air treatment and drivetrain, Knorr-Bremse is now expanding its filter program into a comprehensive premium product range.

Knorr-Bremse is now able to provide distributors, workshops and fleets with a wide range of Air, Cabin, Fuel and Oil Filters at an attractive price-performance ratio. This reduces vehicle operating costs without compromising functionality, quality or safety. The Filters are available for almost every European commercial vehicle application.

Our clearly structured logistics strategy and delivery performance ensure that Knorr-Bremse Filters are available quickly. Further, workshops have online access to all relevant technical data and receive competent assistance and technical support via our technical hotline.

This catalogue gives you a comprehensive overview of the filter program of Knorr-Bremse, sorted by vehicle manufacturer, vehicle series and engine type.

For further information about our filter program please find our Up2Date (Y322966) and brochure (Y255511) on our website:

www.knorr-bremseCVS.com

Additionally you can find the products on our website under Product Search.

THE BEST MATERIAL FOR THE BEST PERFORMANCE

We only use high quality filter media in Knorr-Bremse Filters in order to deliver optimal filtering results.

- Using the latest filter materials, e. g. melt blown media to deliver excellent filter performance, optimal air permeability and efficient contaminant separation
- A special impregnation provides high water resistance, thus ensuring that the filter material remains stable and does not tear even under damp conditions
- Special paper embossing techniques ensure the stability of the pleats and filter
- Uniform pleat structure for optimal filter efficiency
- Excellent chemical resistance

The pictures above show the obvious differences between a high-quality Knorr-Bremse Filter and that of a competitor with substantially inferior pleat stability.

The pleat geometry has a major impact on the performance of a filter, the more exactly spaced the individual pleats, the better the performance and longer service life of the filter.

YOUR ADVANTAGES AT A GLANCE

20 years of experience
in air drying &
oil filtration

We keep our **promise of Quality**
continuous tests ensure that
every component meets
Knorr-Bremse's high standards
of quality at all times

A long vehicle service life
through durable materials,
highly effective filter media
and a precise fitting of the
filter systems

Quick
availability

More than
30 million Air
Dryer Cartridges
produced

THE NEW FILTER PROGRAM AT A GLANCE

AIR FILTERS

Powerful protection for powerful engines

Knorr-Bremse Air Filters remove even very fine particles from the intake air thanks to their stable and high-quality filter medium.

This protects against engine wear and minimizes the intake noise – at an optimal fuel consumption rate.

- EXTENDED VEHICLE LIFETIME thanks to a reduction in engine wear caused by microparticles
- GUARANTEED FUNCTIONAL PERFORMANCE AND AIR TIGHTNESS thanks to precise fitting and robust construction
- ENVIRONMENTALLY FRIENDLY by helping to maintain compliance with emission standards

CABIN FILTERS

Fresh air for a clear run

Knorr-Bremse Cabin Filters supply clean air to the driver's cab by reliably filtering out pollen, dust and soot.

A combination filter with additional activated carbon prevents additional noxious gases and odors from getting into the cab.

- INCREASED WELL-BEING thanks to a reduction of unpleasant smells and moisture
- HEALTH PROTECTION thanks to a reduction in harmful exhaust gases in the breathed air and effective pollen filtration
- INCREASED COMFORT thanks to a reduction in dust deposits within the vehicle

THE NEW FILTER PROGRAM AT A GLANCE

FUEL FILTERS

Clean fuel for clean performance

Knorr-Bremse Fuel Filters prevent even the fine particles from entering the injection system and in so doing increases its service life.

A special water separation function guards all the components of the fuel system against corrosion damage, thereby avoiding expensive repairs.

- IMPROVED PROTECTION OF THE ENGINE against corrosion by minimizing wear through using high-quality filter material with a very high absorption capacity
- CONSTANT PERFORMANCE providing the engine with a stable supply of clean fuel
- EXTENDED SERVICE LIFE of the fuel injection system thanks to particle-free fuel

OIL FILTERS

Well-oiled on long trips

Knorr-Bremse Oil Filters are particularly effective at removing even small particles from the lubricant, thereby reducing engine wear.

The return flow membrane keeps the oil in the filter during maintenance. In addition to this, the bypass valve ensures that all engine parts receive the oil they need under all operating conditions, for example during a cold start.

- REDUCED ENGINE WEAR thanks to reduced contamination of the lubrication system
- OPTIMAL ENGINE PERFORMANCE through optimal oil supply to all relevant engine parts under all operating conditions
- OUTSTANDING OIL TIGHTNESS thanks to precisely fitting filters
